

The UFO

Note: This paper airplane uses scissors!

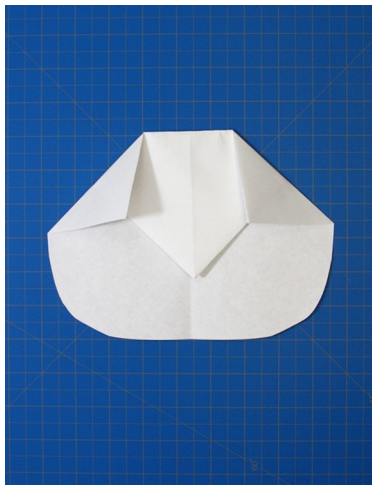

1. Fold paper in half like a hotdog. Cut out the bottom corner to round it off as shown.

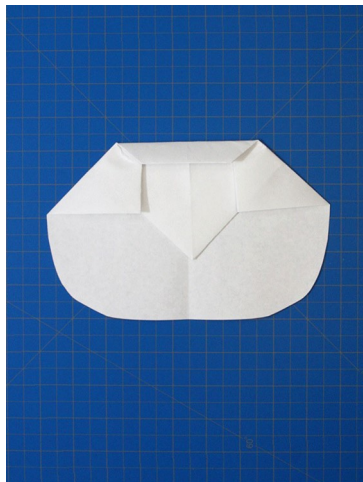

2. Fold the top corners to the center line.

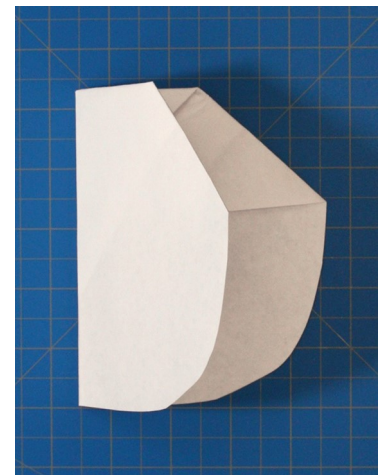

3. Fold the peak down 2 inches before the bottom edge.

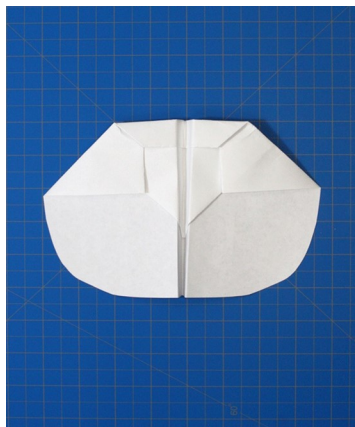

4. Fold down the top two corners about half way down.

5. Now, fold the top edge down about one inch.

6. Fold the plane in half towards you.

7. Finally, fold the sides out to create the long round wings. The body should be a 1/2 an inch.
